*The **BOMA Toronto CDM Program** has been contracted to deliver electricity conservation to the Ontario commercial real estate market as part of the OPA's larger plan to deliver 6300 megawatts of electricity reduction in Ontario from various sources. The available incentives, which are capped at 40% of the eligible projects costs, are for peak demand, consumption or cooling ton reduction, at a rate of \$400 per kilowatt, \$0.05 per kilowatt hour or \$250 per ton (for geothermal space cooling systems), respectively. The Program is designed to maximize participation through its simple application process and quick delivery of incentive payments upon project completion.*
