GreenSaver Celebrates Earth Hour by opening London office

Energy efficiency experts expand into SouthWestern Ontario

(London, March 26, 2010) GreenSaver is expanding.

The well-known not-for-profit energy efficiency organization has opened an office in London, which will act as a base for servicing SouthWestern Ontario.

GreenSaver has been providing home energy audits and other energy efficiency services for over 25 years. GreenSaver's provincial expansion has added over 100 green jobs to Ontario with more on the way. In SouthWestern Ontario, GreenSaver will start with 20 people from the London office, working as Certified Energy Advisors and in support roles, with more being trained in the future.

"We're very excited to be expanding into London," says Vladan Veljovic, President and CEO of GreenSaver. "Energy efficiency is an increasingly important issue for homeowners, and the availability of federal and provincial rebates makes this a particularly opportune time to undertake home energy renovations. It is also a matter of environmental responsibility, and will improve the comfort of your home.

We have been servicing SouthWestern Ontario for some time now, as well as working closely with local businesses, utilities and Fanshawe College. The next logical step is to invest in local green jobs, partnering with local businesses, and ensuring that homeowners have access to a reliable and impartial local energy assessment."

Greensaver's London office is located at: 329 Sovereign Road, London, Ontario
