**Vancouver *Salmon Confidential* screening and Q&A with
David Suzuki and Alexandra Morton on April 18th**

(Vancouver, BC) David Suzuki and Alexandra Morton are teaming up on April 18, 2013 to present and discuss the documentary *Salmon Confidential*. Following the hour-long film, the two scientists will engage the audience on the multitude of issues around the diseases the salmon farming industry may be spreading to our wild salmon, the implications, our food supply and what this issue is costing our economy. Suzuki and Morton will also explore the opportunity B.C. has to bring back our wild salmon economy.

In an endorsement of *Salmon Confidential*, David Suzuki commented, “For years, Alexandra Morton has soldiered on providing evidence of and calling for action on the catastrophic state of wild salmon. Government and industries have thwarted her over and over again. This film clearly documents that governments do not put protection of wild salmon at the top of their priorities and Canadians should be outraged. I am.”
