

## **Green Energy Doors Open Wants You**

*Join with Your Fellow Sustainable Energy Leaders and Sign Up to Participate In the Second Annual Doors Open Day*

**(September 9, 2013)** The Ontario Sustainable Energy Association (OSEA) is building on the success of the first Green Energy Day that was held in 2011, by hosting a second province-wide renewable energy showcase. Green Energy Doors Open is being held across the province on Saturday, October 5<sup>th</sup>. The goal is to have a presence in 50 Ontario communities. To become a host, explore where the sites are, or become a sponsor visit [www.greenenergydoorsopen.ca](http://www.greenenergydoorsopen.ca).

“To date there are 20+ hosts but we want to encourage more Ontarians to participate in Ontario’s Green future. This is an opportunity for homeowners, business owners and farmers to step up and showcase the successes they have had with their Feed-in Tariff, conservation and green transportation initiatives,” explains Kristopher Stevens, OSEA’s Executive Director. “The idea is simple: we want to encourage local renewable energy and conservation projects big and small to open their doors.”

Participating is easy. The site owners decide how they would like to showcase their energy project. In the past people have done live demonstrations, hosted workshops, shown movies and done tours. The goal is to inspire Ontarians to move toward a greener future for the next generation. Whatever the event, more Ontarians will learn about the benefits of Green Energy.

Host benefits include: a comprehensive guide for organizing the event, literature and informative brochures for the event and give away items.

Ontario has established itself as a leader in renewable energy in North America. We were the first province to get rid of dirty coal. So far Feed-in-Tariff projects have created more than 28,000 new green jobs and we want to see that trend continue.

We look forward to seeing even more people sign up. Help OSEA surpass its goal with this important and fun day that celebrates Ontario’s green future. Visit [www.greenenergydoorsopen.ca](http://www.greenenergydoorsopen.ca) and sign up today.
