

Open tour of Green Sun Rising in Windsor offered as part of Green Energy Doors Open

(Windsor, ON, October 3, 2013) Green Sun Rising Inc., an Ontario-based solar company, is offering a public tour of its facility in Windsor. This tour, one of over 60 locations across the province participating in Green Energy Doors Open, is being offered on Saturday, October 5th between 10:00 a.m. and 2:00 p.m.

One of the company's newer products, the solar pergola, can serve as a solid cover to provide shade for a patio, or as a carport to protect vehicles. At the same time, it produces clean electricity and can generate attractive revenue under the microFIT program. For electric vehicle owners Green Sun Rising offers the carport solution with an integrated electric charging station.

Green Sun Rising is located at 1680 Kildare Road.

Green Energy Doors Open 2013 is the Ontario Sustainable Energy Association's annual, single-day showcase of the province-wide green energy economy. Green Energy Doors Open is an opportunity to provide free-of-charge access to individual, community, public and commercial sustainable energy projects, businesses, manufacturing sites, education programs and other related initiatives.

"We are excited to have over 60 great hosts sharing their stories during Green Energy Doors Open," says Kristopher Stevens, Executive Director of OSEA. "Sustainable energy has the power to drive Ontario's prosperity. These amazing folks are showing us how."

Green Energy Doors Open encourages all users, producers and advocates of sustainable energy to open their doors in order to raise awareness, understanding and support for sustainable energy by providing people with the opportunity to visit, see, touch and talk about the projects in their own backyards.
