

All-Energy Canada: forward-thinking renewable energy solutions for North America

April 9th and 10th, 2014: Direct Energy and Allstream Centre, Exhibition Place

(Toronto, ON December 11, 2013) This coming April a chance to discuss the future solutions of the renewable energy and conservation industries is coming to Canada. All-Energy Canada, a solutions-based exhibition and conference, is coming to North America. All-Energy brings together the renewable energy and conservation industries.

All-Energy Canada is modeled on the UK's largest renewable and conservation energy event which takes place yearly in Europe's energy city, Aberdeen. In 2013, 876 organizations exhibited and 500+ speakers took part at All-Energy events. In 2014, All-Energy is expanding into Canada and will be delivered by the same people who are responsible for the successful events in Europe and Australia.

Often at large conferences there isn't an opportunity to do business. All-Energy Canada's **Share Fair** is about to change that. The Share Fair is an innovative way for producers and developers to learn about each other's needs and wants and to discuss business opportunities and near-term solutions. This experience will allow attendees to cement new relationships and discuss the opportunities for building export potential.

Whether on the conference floor in the Allstream Centre or on the exhibition floor in the Direct Energy Centre, there will be organizations from across all sectors of the renewable energy and conservation industries. The conference will feature speakers from around the world who are industry leaders and who have forward-thinking solutions in the renewable energy sector. It is expected that over 2,500 people will attend All-Energy Canada.

"We are excited to be working with our Canadian partners to bring this event to North America," stated Jonathan Heastie, Reed Exhibitions. "We have had huge success in Europe and know we have the potential to have the same success in Canada."

The conference will have many themes including: economic development, energy efficiency and conservation, business-to-business, integrated systems, low carbon transportation and labour and skills. This is an opportunity for the industry to come together and discuss what has worked, what hasn't worked and come up with solutions that will guide the renewable energy industry into the immediate future.

For more information on All-Energy Canada please visit <http://www.all-energy.ca/>. To arrange an interview please contact Emily Kirk at ekirk@ecostrategy.ca or directly at 416-972-7404.

All-Energy Canada is organized by Reed Exhibitions the world's leading event organizer, with 500 events in 41 countries and is held in association with the Ontario Sustainable Energy Association (OSEA) and the Canadian Solar Industries Association (CanSIA).

Reed Exhibitions also organize the World Future Energy Summit (WFES) the world's foremost annual event dedicated to advancing future energy, energy efficiency and clean technologies. The Summit held in Abu Dhabi attracts world leaders, international policy makers, industry leaders, investors, experts, academia, intellectuals and journalists to discuss practical and sustainable solutions to future energy challenges. Reed's World Energy Week in Tokyo attracted over 120,000 visitors in four days.
