3. Some **trade show** space remains, the details can be secured from Ruth Stuart Moore, ruth.stuartmoore@reedexpo.co.uk or by calling her at 647-703-8119.

All- Energy Canada Background

All-Energy Canada is both a multi-stream world class conference and a busy trade show.

The conference will include 150 leading renewable energy speakers, 2 plenaries, 24 sessions and 6 simultaneous tracks.

All-Energy Canada Exhibition & Conference, the third event in the global All-Energy series, is a forum for national and international experts in the renewable energy industry and energy conservation sectors to explore new ideas, markets and solutions - with a particular focus on trading with, and within, North America.

All-Energy Canada is a solutions-based event that will bring together the full renewable energy industry in one location at one time: renewable energy, conservation/efficiency, smart cities/smart grid, financing, education and related sectors.

Like its sister events in the UK and Australia, All-Energy Canada is about creating new opportunities and generating business - expanding your horizons and exposing your organisation to new contacts outside your normal circles - from other sectors, provinces, countries and continents.

For more details:

Don Huff, Environmental Communication Options, 416-972-7404 or Kris Stevens, Ontario Sustainable Energy Association (OSEA) 416-977-4441 for more details.
